

# THE MARIST CATHOLIC PRIMARY SCHOOL

*Together, Achieving, Loving, Learning*

*With God as our Guide we will value each other and work together to achieve our best*

## Supporting Pupils with Medical Conditions Policy

Policy compiled by:	Inclusion Leader
Responsible committee:	Resources
Approved by Governing Body:	November 2015
Review Date:	November 2016

**This school is committed to safeguarding and promoting the welfare of children and young people and expects all staff and volunteers to share this commitment.**

### Our Mission Statement

*The Marist School is a place of teaching and learning:*

- *Where we promote the Christian growth of children in a caring environment.*
- *Where everyone is valued not just for what they do or give, but for who they are; a traveller on the way to Christ.*
- *Where children are encouraged and stimulated to achieve their full potential spiritually, academically and socially; where talents and successes are shared and celebrated.*
- *Where all staff work and grow together as a team, giving of their best and supporting each other.*
- *Where all members of the community are made to feel welcome and encouraged to take an active part in the life of the school.*

### Preamble

This policy should be read in conjunction with the Administering Medicines policy and, if applicable, the SEN policy.

This policy is written in regard to Section 100 of the Children and Families Act 2014 which places a duty on governing bodies to make arrangements for supporting pupils at their school with medical conditions.

### Aims

- To ensure pupils at school with medical conditions, in terms of both physical and mental health, are properly supported so they can play a full and active role in school life, remain healthy and achieve their academic potential.

- To ensure the needs of children with medical conditions are effectively supported in consultation with health and social care professionals, their parents and the pupils themselves.

### **Procedure**

The Inclusion Leader is responsible for ensuring that whenever the school is notified that a pupil has a medical condition:

- sufficient staff are suitably trained
- all relevant staff are made aware of a child's condition
- cover arrangements in case of staff absence/turnover is always available
- supply teachers are briefed
- risk assessments for visits and activities out of the normal timetable are carried out
- individual healthcare plans are monitored (at least annually)
- transitional arrangements between schools are carried out
- if a child's needs change, the above measures are adjusted accordingly

Where children are joining The Marist at the start of a new academic year, these arrangements should be in place for the start of term. Where a child joins mid-term or a new diagnosis is given, arrangements should be in place as soon as possible, ideally within two weeks.

Any pupil with a medical condition requiring medication or support in school should have an individual healthcare plan which details the support that child needs. If the parents, healthcare professional and school agree that a healthcare plan is inappropriate or disproportionate, a record of the child's medical condition and any implications for the child will be kept in the school's medical record and the child's individual record.

### **Individual Healthcare Plans (IHPs)**

The following information should be considered when writing an individual healthcare plan:

- the medical condition, its triggers, signs, symptoms and treatments
- the pupil's resulting needs, including medication and other treatments, times, facilities, equipment, testing, dietary requirements and environmental issues
- specific support for the pupil's educational, social and emotional needs
- the level of support needed including in emergencies
- who will provide support, their training needs, expectation of their role, confirmation of their proficiency and cover arrangements
- who in school needs to be aware of the child's condition and the support required
- arrangements for written permission from parents for medication to be administered by a member of staff or self-administered (children who are competent should be encouraged to take responsibility for managing their own medicines and procedures, with an appropriate level of supervision)
- separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the child can participate
- confidentiality
- what to do if a child refuses to take medicine or carry out a necessary procedure
- what to do in an emergency, who to contact and contingency arrangements
- where a child has SEN but does not have an Education, Health and Care plan, their special educational needs should be mentioned in their individual healthcare plan

### **Roles and Responsibilities**

Supporting a child with a medical condition during school hours is not the sole responsibility of one person. The school will work collaboratively with any relevant person or agency to provide effective support for the child.

### ***The Governing Body***

- must make arrangements to support pupils with medical conditions and ensure this policy is developed and implemented
- must ensure sufficient staff receive suitable training and are competent to support children with medical conditions
- must ensure the appropriate level of insurance is in place and appropriately reflects the level of risk

### ***The Head Teacher***

- should ensure all staff are aware of this policy and understand their role in its implementation
- should ensure all staff who need to know are informed of a child's condition
- should ensure sufficient numbers of staff are trained to implement the policy and deliver IHPs, including in emergency and contingency situations, and they are appropriately insured
- is responsible for the development of IHPs
- should contact the school nursing service in the case of any child with a medical condition who has not been brought to the attention of the school nurse

### ***School Staff***

- any staff member may be asked to provide support to pupils with medical conditions, including the administering of medicines, although they cannot be required to do so
- should receive sufficient and suitable training and achieve the necessary level of competency before taking on the responsibility of supporting children with medical conditions
- any staff member should know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help

### ***School Nurses***

- are responsible for notifying the school when a child has been identified as having a medical condition which will require support in school
- may support staff on implementing a child's IHP and provide advice, training and liaison

### ***Other healthcare professionals***

- should notify the school nurse when a child has been identified as having a medical condition that will require support at school
- may provide advice on developing healthcare plans
- specialist local teams may be able to provide support for particular conditions (eg. Asthma, diabetes)

### ***Pupils***

- should, wherever possible, be fully involved in discussions about their medical support needs and contribute to, and comply with, their IHP

### ***Parents***

- must provide the school with sufficient and up-to-date information about their child's medical needs
- are the key partners and should be involved in the development and review of their child's IHP
- should carry out any action they have agreed to as part of the IHP implementation

### **Notes**

The following practice is considered not acceptable:

- preventing children from easily accessing their medication and administering it when and where necessary
- assuming children with the same condition require the same treatment
- ignoring the views of the child, their parents; ignoring medical advice or opinion

- sending children with medical conditions home frequently or prevent them from staying for normal school activities (unless specified in IHP)
- penalizing children for their attendance record if their absences are related to their medical condition that is recognized under this policy
- preventing children from drinking, eating or taking toilet breaks whenever they need to in order to manage their medical condition effectively
- to require parents to attend school to administer medication or provide medical support to their child, including toileting issues except where it is reasonable for the school to do so by reference to the severity of need or risk (no parent should have to give up working because the school is failing to act reasonably to support their child's medical needs)
- preventing children from participating, or create unnecessary barriers to children participating in any aspect of school life, including school trips.)

### **Review and Evaluation**

This policy will be monitored annually for effectiveness and updated in the light of experience.

Policy reviewed and updated: November 2015

Date of next review: November 2015
